### Conversion Rate Adjustment Upon a Make-Whole Fundamental Change:

If a make-whole fundamental change occurs and a holder elects to convert its notes in connection with such a fundamental change, Diodes will increase the applicable conversion rate for the notes surrendered for conversion by a number of additional shares of Diodes common stock (the “make-whole shares”) based on the date when such make-whole fundamental change becomes effective. However, in the case of a public acquirer fundamental change, Diodes may, in lieu of increasing the conversion rate, elect to adjust the conversion rate to reflect the exchange ratio for the transaction, in which case the securities will become convertible into shares of the public acquirer’s common stock. If the transaction provides the holders of Diodes common stock with the right to receive more than a single type of consideration determined based in part upon any form of stockholder election, the holders of the notes, each treated as a single class, will be given a reasonable opportunity to elect the form of such consideration.

The following table sets forth the number of additional shares per \$1,000 principal amount of notes that will be added to the conversion rate applicable to notes that are converted during the make-whole conversion period. The applicable prices set forth in the first column of the table below, and the number of additional shares, are subject to adjustment as described in the Preliminary Prospectus relating to the security.
